### **DETAILED ACTION**

The Amendment filed December 18, 2009 has been received, entered into the record, and carefully considered. The following information provided in the amendment affects the instant application by:

Claim 1 has been amended.

Remarks drawn to rejections of Office Action mailed 7/22/09 include:

102(b) rejection over US 2003/0109697: which has been overcome by applicant's amendments and has been withdrawn.

An action on the merits of claims 1-40 is contained herein below. The text of those sections of Title 35, US Code which are not included in this action can be found in a prior Office action.

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/18/2009 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

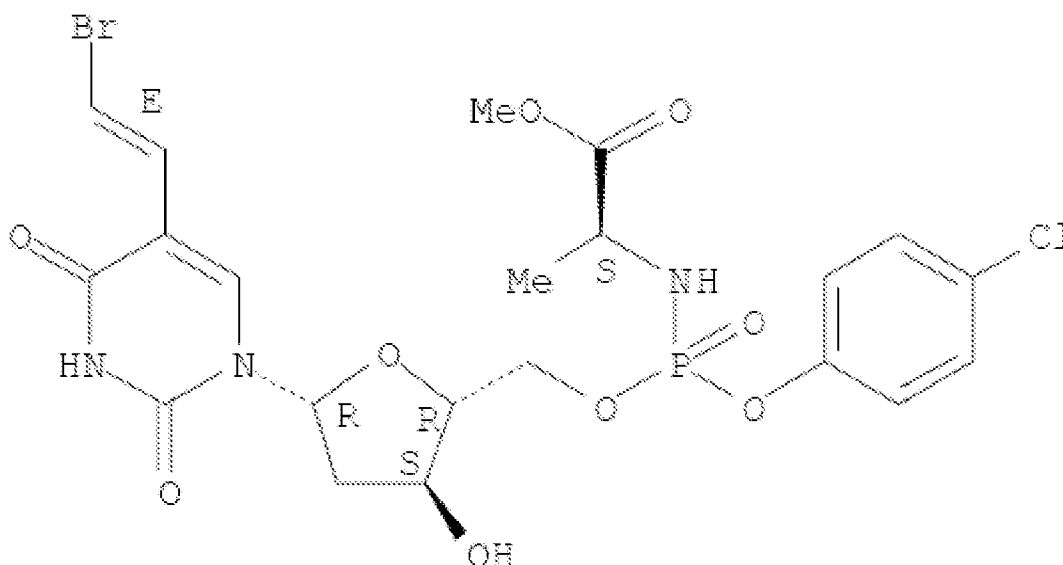

Art Unit: 1623

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-6, 8-9, 11, 14-16, 21-22, and 24-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Harris et al. (Antiviral Chemistry and Chemotherapy, vol. 12, 2001, pp 293-300).

Harris et al. disclose compound 5 which is set forth by the structure:

which anticipates the compound of formula I wherein X and Y are H; n is 1; Z' is =O; Z is bromovinyl (which is encompassed by the specification's definition of alkyl); Ar is substituted phenyl; R' is H; R'' is methyl; and R is methyl. It is noted that only compounds which have unsubstituted  $-C_6H_5$  groups in the Ar position are excluded by the instant claim language. Harris set forth methods of making the compound by reacting the 5'-OH group with the phosphorous group (see figure 1). Harris also set forth pharmaceutical compositions comprising the same (see abstract). The species set forth above is seen to anticipate the claims above.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 is drawn to a “use of a compound according to claim 1”, however, it is unclear as to what is intended by the claim. It is noted that the examiner previously made, and subsequently withdrew this rejection, however, it is still not clear as to what is encompassed by the claim. If applicants are claiming a method, the claim should be drafted such as “a method of manufacturing a medicament of claim 1”, or “a method of treating cancer comprising administering the compound”. “Use” claims are normally not used in US Patent practice.
